

Qi Quant 

Qi

The universal life energy is the sum of all important frequencies and information that is required for every human action on a physical and psychological level.

Quant

The light quanta (biophotons) form fields that penetrate all human systems, transport and make life energy available at an incredible speed.

QI-QUANT IS THE OPTIMAL ENERGETIC CELL FOOD.

Embark on NEW AVENUES for your health with a focus on prevention, regeneration, and performance enhancement.

The fusion of quantum physics, natural frequencies, and a profound understanding of energetics lays the groundwork for Qi-Quant energy regulation.

In the field of energy medicine, it's widely recognized that our bodies don't just rely on processing nutrients and oxygen for functioning. The influence of our earth's magnetic field, the sunlight spectrum, and cosmic information is another basis for biological life.

These fundamental energies and their respective frequencies maintain the energetic order and energetic supply in the human body organism.

Every single cell is like its own life system and a specific energy potential. This energy is vital for all the cell's internal processes and subsequently for communication with other cells. The cell builds up this energy potential by absorbing biophotons (light quanta) and storing them. When the energy potential decreases too much, the cell's ability to carry can only perform its intracellular and extracellular functions poorly, or not at all.

Qi-Quant energy regulation provides cells with biophotons (light quanta) through the energy system (chakras) at an optimal frequency range, swiftly elevating the energy potential of cells to a high level. This rapid boost reactivates the body's self-healing abilities and facilitates quick regulation of cell functions. The impact of Qi-Quant energy regulation on the user is entirely energetic and encompasses all recognized supports for energetic recovery (refer to the legal notice on page 27).

THE QI-QUANT TECHNOLOGY

Harald Granzer, the developer, is motivated by the idea of creating an ideal energetic feel-good zone and fostering regeneration for people. You can personally experience this vision through the distinctive Qi-Quant products.

Qi-Quant breaks new ground in Quantum physics

After 17 years of dedicated research in the field of quantum physics, Harald Granzer has successfully created a series of distinctive „energy products“ with unique quantum-physical properties.

His extensive experience includes years of collaborative development with Dr. Robert Becker and the Dr. Becker Institute in New York. Additionally, ongoing research exchanges with globally renowned scientists, quantum physicists, and biologists, such as Dr. Bruce Lipton (a stem cell researcher), have contributed to the groundbreaking results that underpin the unique Qi-Quant Technology.

The Qi-Quant laboratories consistently explore innovations and advancements in energy medicine, seamlessly incorporating them into the creation of new Qi-Quant products.

The Qi-Quant Technology

Qi-Quant Technology represents a fusion of Tesla patents, expertise in frequency therapy, energetics, and the latest findings from „quantum physics research.“

The Qi-Quant products, physical in nature, incorporate over 1,000 electronic components. Notably, these products operate using free (zero-point) energy, eliminating the need for electricity or any form of battery. This exclusive and distinctive process is rooted in decades of research conducted by the Dr. Robert Becker Institute in the USA, and it is reserved solely for Qi-Quant products.

These products intelligently regulate energy without the need for constant re-tuning. The vital fields they generate encompass all cells, earth, sunlight, and cosmic frequencies, facilitating natural regulation at every level of the human organism. This activation, in turn, triggers the body's inherent self-healing powers.

The distinctive Qi-Quant Technology comprises the following components:

1. Quantum energy information matter
2. Quantum field generators
3. Frequency converters

How does Qi-Quant work?

Qi-Quant operates by modulating the defined bio information acquired from 17 years of research onto an Extremely Low-Frequency (ELF) scalar wave. This encoded information signal is then amplified and impressed onto carrier materials within a Faraday cage, utilizing specially developed flat coil arrangements.

The quantum field generator comes into play by building up the vital field. It not only constructs the field but also ensures its permanent stabilization and regulates its strength.

The frequency converter plays a crucial role by translating the information from the quantum-energetic materials into the established vital field. This step ensures that all necessary frequencies are provided for optimal functionality.

All Qi-Quant products are meticulously handmade in Austria and Switzerland, emphasizing the precision and care involved in our production.

CELL ENERGY THROUGH FREQUENCIES

Each human cell resonates with a certain frequency from the Earth's magnetic field, sunlight, and the cosmos.

By providing our cells with this optimal frequency spectrum, they can fully unlock and develop their energy potential.

ENERGY DEFICIENCY DUE TO EVERYDAY STRESS

Energetic interference fields and insufficient energy in water, air, and our food can result in a slowing down of cell vibration.

These influences block the positive impulses within the „vital frequency spectrum“ originating from the sun, the Earth, and the cosmos.

A LOW ENERGY POTENTIAL DISRUPTS CELL FUNCTION AND REGULATION

This can lead to chronic and acute mood disorders, such as:

- Physical pain
- Fatigue
- Lack of concentration
- Lack of motivation
- Sleep problems

VITAL FIELD TRANSFORMER

For a life without radiation exposure

With the Qi-Quant vital field transformer, we offer an effective and user-friendly universal solution for home vitalization that anyone can install themselves. This device generates a vital field throughout the entire house or apartment. It establishes a negative ion field within the walls, creating a protective screen that blankets your entire living space. This transformation mitigates the impact of positive ions (electro-smog).

Earth radiation and electro-smog can drain people's energy, induce vegetative stress, and alter the ion ratio in the room air. The Qi-Quant vital field transformer is designed to counterbalance geo-pathogenic stimulation fields, such as those caused by water veins. By neutralizing these influences, the body is no longer deprived of energy in these zones, resulting in increased resilience. This strengthening effect enhances the body's self-healing powers, allowing all physical systems to naturally recover within a balanced vital field.

The Qi-Quant vital field transformer effectively balances the impacts of electro-smog and earth radiation, ensuring a revitalized & harmonious living environment.

The Qi-Quant Vital Field Transformer works in several areas

Distinguishing itself from cheaper systems that simply „reprogram“ or „harmonize“ radiation, the Qi-Quant Vital Field Transformer goes a step further by neutralizing the frequencies associated with all geo-pathic stress elements such as water veins, tectonic fractures, and global grids, as well as those linked to electro-smog.

Digital use without radiation exposure

It has now been scientifically proven that electromagnetic fields from smartphones, televisions, PCs and many other electronic devices contribute measurably to daily stress levels. Wi-Fi signals are also all strong emitters of electromagnetic radiation. These devices and the 5G smartphones are generally the strongest sources of electrosmog in our own environment. The Qi-Quant vital field transformer neutralizes this radiation exposure and thus enables stress-free online use of digital devices connected to Wi-Fi and/or mobile communications for the body.

Healthy sleep

In the harmonious environment created by the vital field transformer, the body experiences faster and easier regeneration during sleep. The increased number of deep sleep phases accelerates the overall regeneration process significantly. With the elimination of constant irritation from electro-smog, sleep quality undergoes a transformative improvement, resulting in a refreshed and vital awakening each morning.

Full effect in just a few minutes

Upon connecting the vital field transformer, complete neutralization of the radiation load is achieved. The vital field transformer is positioned within a room and connected to the earth via a socket. The earthing cables of the house installation facilitate the ionization of the walls. Importantly, the Qi-Quant vital field transformer operates naturally without electricity, solely utilizing the earthing network of the house as a static arrestor for stressful frequencies.

Sleep well again

Paracelsus, 500 years ago, imparted the wisdom that „A sick bed is a sure way to ruin your health.“ Continuous sleep deprivation or severe sleep disorders can lead to significant health issues, including conditions like depression or other nervous disorders. It is surprising how frequently the intensity of environmental risks is notably high, especially in the sleeping area at home.

The central point of emphasis in all building biology measurements, consultations, and renovations is consistently the sleeping area. There is no other space where we spend more time and more consistently than in our bedrooms. Moreover, nowhere else are our bodies and psyches more sensitive, vulnerable, and defenseless than during the delicate phases of sleep. In this space, the goal is relaxation, not tension.

During regenerative passive night's sleep, people are significantly more sensitive compared to the waking phase. Our immune system, regulatory abilities, and vegetative processes operate in the background during this time. Nighttime is crucial for repairing the damage accumulated throughout the day. It is essential for constant exposure to environmental stimuli, such as e-smog from WLAN, cell phone masts, or power lines, as well as geopathogenic stress from pressure or sound waves from deep within the earth and subtle irritation zones like water veins or grids, to cease.

At night, the body anticipates rest, relaxation, and passivity, not stress, stimulation, or activity. An uninterrupted sleeping area is fundamental for vitality and health, playing a crucial role in overall life quality. According to many doctors, a conducive sleeping environment is also a prerequisite for successful medical diagnosis and therapy, particularly in the context of naturopathic treatments.

How sensitive are you?

Occasionally, you encounter individuals who claim they can sleep well anywhere. This is entirely possible, as there are both sensitive and less sensitive people among us. Being part of the „sensitive“ group is, in fact, a positive sign. Although it might not be immediately apparent, these individuals can rely on their body's reactions. Every sign, whether positive or negative, is a message. In this case, it indicates that a particular sleeping environment might not be suitable. For less sensitive individuals, the body may not provide immediate clues, and they may seem well for a prolonged period. However, serious illnesses may later emerge instead of small early warnings from the body.

VITALITY THROUGH THE REVITAL

The Origin of Our Food

A growing number of people are recognizing the significance of healthy food. The quality of organically processed products relies heavily on the quality of all raw materials. This is crucial for storing natural energy in the form of bio-photons within the food. Biochemists have long been aware of the energy quality of food.

Life is more than just the sum of all ingredients; it encompasses the vitality and energy contained within.

From Food to Nutrition

Why does an apple freshly picked from our own tree often have a more enjoyable taste compared to an apple of the same variety produced in large-scale fruit cultivation and transported over long distances?

Plants, when grown in either direct or indirect sunlight and nurtured in nutrient-rich, natural soil, harness, and store energy in the form of bio-photons. The energy quality of our food is adversely affected by various pesticides, artificial fertilizers, and cultivation methods.

As early as 1940, researchers in New Zealand showcased the importance of high-quality organic food for our health through a comprehensive study. ReVital presents a way to instill the characteristics of premium organic food into all types of food, providing a noticeable difference in taste!

Why ReVital?

ReVital embodies the essence of enjoyment, quality of life, and safety. Harness the power of nature to enhance your well-being through the unique quality of food!

Built on the principle of information transfer, ReVital rejuvenates all solid and liquid foods, restoring their inherent life force. Your food is naturally and biologically elevated to a state of being „full of life“ once again. Notably, ReVital is entirely service and maintenance-free.

Simply place your food directly on the stainless steel surface of ReVital. The nature-identical vibration information generated within ReVital is seamlessly transferred to the food.

Application & effect

Numerous customers confirm that using ReVital ...

- Significant improvement in the natural taste and aroma
- Noticeable harmonization of all ingredients
- Enhanced compatibility with various foods
- Accelerated and more luxuriant growth of ornamental and crop plants with ReVital on seedlings
- Improved tolerance of cosmetics and hygiene products (sanitary towels, OB, diapers, etc.)
- Vitalization of drinking water

To infuse energy into food, liquids, and diverse materials, while also cleansing frequencies associated with toxins found in: clothing, shoes, bedding, plastics (including toys and food containers), pesticides (present in fruits and vegetables), heavy metals (existing in food) etc.

WATER ALIVE

In the words of Leonardo da Vinci, „water is the blood of the earth.“ All living beings, to some extent, comprise water, and it serves as the primary component of the human body, our most essential ingredient. If you appreciate a consciously healthy and modern lifestyle, you also recognize the importance of high-quality water.

Water - the source of all life

Revitalized water boasts a deep cell-cleansing effect and elevates the level of vital energy, impacting not only when consumed but also during activities like showering or bathing. It enhances the cells' regenerative capacity, offering a noticeably softer feel and taste. Additionally, revitalized water proves beneficial to both skin and hair.

Water possesses a distinctive physical capability to absorb, store, and transmit information to the environment. It responds to various vibrations, absorbing both biological signals from nature and technical signals from alternating electromagnetic fields.

Crucially, it's worth noting that any information absorbed by water on its journey through pipes can be erased. Through our WATER ALIVE water revitalization system, tap water is restored to its natural energetic quality using oscillation information. This process eliminates all „negative“ information in the water while simultaneously boosting the bio-photon level.

Pictorial representation of water crystals. Photographed using the Emoto method (by Masaru Emoto in 2005 in Zurich) under a microscope with 300x magnification at a temperature of -5 °C.

Zurich tap water ...

obtains ...

a new microstructure with Water Alive.

Why does water directly from the source generally have a more pleasant taste compared to water that has been transported through our supply networks?

Water loses its inherent life properties when subjected to high pressure and forced into round pipes, disrupting its crystalline structure, vitality, and electromagnetic power. This process significantly diminishes the bio-photon content per water molecule.

WATER ALIVE operates on the principle of information transfer and revitalization. It elevates the biophoton level, thereby restoring water to a biologically valuable state characterized by high inner order and stability. This transformation imparts tap water with the qualities of fresh spring water, rendering it akin to the taste of water „fresh from the spring.“

WATER-ALIVE devices operate with free zero-point energy, without electricity and chemical additives, making them climate-neutral, and entirely service and maintenance-free.

Hardness stabilization & lime-scale

WATER ALIVE alters the molecular structure of limescale, disrupting the formation of solid chains. This preventive action inhibits the development of aggressive limescale or boiler scale and the accumulation of limescale residues on taps, tiles, dishes, etc. As a result, limescale residues become easily removable with a kitchen towel.

Areas of application and possible uses:

- **Drinking and eating** (promoting healthy nutrition with high-quality water!)
- **Showering and bathing** („soft feel-good water“ for enhanced bathing experience)
- **Ornamental and kitchen gardens** (stimulating lush plant growth)
- **Wellness and spa** (revitalized swimming pool for velvety soft skin and hair, reduced chlorine)
- **Animals** (encouraging increased water intake, less susceptibility to diseases)
- **Agriculture** (facilitating faster plant growth, heightened resistance to environmental pollution, increased yield; promoting healthier laying hens with more beautiful feathers and higher-quality eggs; supporting healthier cows with reduced mastitis)
